DETAILED ACTION

Allowable Subject Matter

Claims 21-40 are allowed.

The following is an examiner's statement of reasons for allowance: Prior art of record do not teach a floor reaction force detection system of a legged mobile robot having at least a body and a plurality of legs each connected to the body through a first joint, and each having a foot connected to a distal end of the leg through a second joint, comprising a displacement sensor installed at a position in or adjacent to an elastic member that contracts in response to a load and is disposed between the second joint and a floor contact end of the foot, and generating an output indicating a displacement of the floor contact end of the foot relative to the second joint; and a floor reaction force calculator that calculates a floor reaction force acting on the foot based on the output of the displacement sensor, by using a model that describes a relationship between a displacement and a stress generated in the elastic member in response to the displacement of the floor contact end of the foot.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
